OUR SLOGAN: An Industrial Metropolis of Industrious People Who Pull Together.

Volume 18

THE REDCLIFF REVIEW THURSDAY, AUG. 13th, 1931

Number 47

## Town Council Still Selling Property

Also Enquiry About Building New Industry

The regular meeting of the Town Council was held last Monday evening.

After disposing of the minutes of the previous meeting Mr. Bergeron waited on council and complained about Mr. Van Wert collecting and delivering passengers in and around town without paying any town license, while he, Mr. Bergeron, paid the town license and could not do the same thing. He asked that the town investigate the matter. On motion of councilors and Lavelle the May was instructed to get legal advice on the question.

Mr. Wyatt waited on council and asked for a price on the old truck factory in which he contemplated starting a factory. Council asked Mr. Wyatt to submit his proposition in writing giving full details of his proposed plans and same would be considered at next meeting. Council was unanimous in offering to co-operate with Mr. Wyatt in every way with his venture.

A letter was read from the department of Municipal Affairs in answer to a letter from the town regarding unemployment relief. The letter stated that no definite information could be given until Premier Brownlee returned from the east where he is taking up the matter with the Dominion government.

G. N. Pearson wrote offering \$5.00 a month rent for the store on Third street just south of the old Amuse U theatre. The offer was accepted on condition he repairs the building himself.

H. G. Larsen wrote offering \$200 for the old Wallace barn on First street south west. The offer was accepted.

Mrs. B. Reynan wrote offering \$100 for the building once known as the Northwest Grocery in the west end of town. The offer was accepted.

The Mayor drew attention to the work done on Broadway and Third streets and stated that the government engineer advised that the grader be run over the roads every other day to put the bed in good shape after being scarified. It was decided that this be done.

## DRIVE STARTED ON COMMUNIST LEADERS

Judging from the number of arrests made both east and west during the past week it is evident that the wheels have already been set in motion to round up leaders of the Communist party who have been creating disturbances in this country lately. Raids were made on the headquarters of the officers in Toronto and from documents secured, Dominion and provincial police hope to prove that the arrested men are working directly under the domination and control of the third International at Moscow from which source they are getting large sums of money.

Water Canada coal will be used exclusively to heat Manitoba government buildings next winter, provided that a satisfactory price is named in tenders

## Four Football Teams Play Here Last Week

Diamond D Girls Win and Men Play a Draw.

A return game between the Diamond D and Brick & Coal football girls was played here last Thursday evening. Although the Glensers came out ahead to the tune of 8 to 1 the game was very evenly contested from start to finish. The Diamonds' forwards showed up to the best advantage and it was their accuracy in passing and team work when close in that won them the game. Each contest shows a marked improvement in the girls' knowledge of the game as well as in their staying power.

Their games are now looked forward to with interest by fans

On Friday evening the Brick & Coal were at home to the Diamond D Men's team in a league fixture. As so often happens when these two teams meet, the game ended in a draw, neither side scoring during the whole game. Honors were very even. First one side would put on a good exhibition and then the other and this was kept up pretty throughout the game. It could hardly be said that either team had any the best of it.

## CONSERVATIVES WIN IN PRINCE EDWARD ISLAND

In the general provincial election held in Prince Edward Island last Thursday, the Conservative party headed by Hon. J. D. Stewart, were swept into power, defeating the Liberal administration under the leadership of Hon. W. M. Lea. The standing of the parties before the election was: Liberals 22, Conservatives 19, Liberals 10.

Railway express companies are lowering their rates to compete with motor trucks.

## More Items of Local Interest

Mr. Edward Ellis is spending a few days in Medicine Hat visiting Mr. and Mrs. Legro.

Mrs. C. V. Gibson and Miss Clara Jane spent Monday in the guests of Mrs. Sellhorn.

Mrs. Percy Seale of Etzlemb, is spending his holidays in town the guest of Mr. and Mrs. Carl Martin.

Mrs. McKnight and son, Kenneth, returned on Monday from Calgary where they have been visiting Mrs. McKnight's sister for a week.

A move is on foot in Canada and United States to have no open season for wild ducks this fall, or at most for only a few weeks.

Sid Robinson, head operator at the glass plant at Wallaceburg, two has been here for the past month, left on Thursday for the east.

Mr. and Mrs. Donald McLachlan left last Monday for Pentticon and other B. C. points to spend a few weeks visiting their two daughters.

At the Sunshine Trail Association meeting held yesterday a resolution was passed urging the building of a highway from Medicine Hat to Hare, Ont.

Mrs. Geo. Gibson, Mrs. E. Cooper and Miss Gloria Cooper of Medicine Hat, and Mrs. S. Reid of Arrowwood, were guests of Mrs. W. J. Fairbairn Tuesday.

Mrs. Stewart, of Medicine Hat, entertained at the hour on Saturday in honor of her daughter, Mrs. McKennie who is leaving shortly for her new home in Plaport. Among the guests were Mrs. Waloff and Mrs. Stone of Redcliff.

Mrs. A. N. Collard and Muriel are at present in Winnipeg where the latter is undergoing medical treatment. They will visit Mrs. Collard's parents at Harding, Man. before returning.

A. Gale and T. McClellan left on Wednesday for the Peace River district with three car loads of effects. Mrs. Gale and Mrs. McClellan with their families will leave Saturday.

Messrs. A. E. Tester, Joe Tester and J. T. Devitt returned Sunday from their intended trip to the Peace River district. They got only as far as Athabasca Landing when bad roads forced them to abandon the trip and they returned. Mr. Tester says the roads were so bad from rain that scores of cars were in the ditch at the end of the gravelled road.

A quiet wedding took place in Medicine Hat on Saturday, Aug. 8th, when Miss Ester Johnson, eldest daughter of Mr. and Mrs. Johnson of this town, was married to Mr. Vercy Niles of Merrol, Alberta. The young couple will make their home in Merrol.

## MAYOR WORTS' CAR IS DESTROYED BY FIRE

Caught Fire While Driving in The Country Wednesday Evening

Mayor Worts' Studabaker car was completely destroyed by fire last Wednesday evening. Mr. Worts was driving north and when about a mile from Fred Walker's farm, flames suddenly burst through the floor of the car at his feet. His worship had barely time to get out of the car to save his clothing from catching fire. In a few minutes the whole car was ablaze. He had to walk to Mr. Walker's and phone to town to get a lift home. It is not definitely known how the fire started. The loss will be partly covered by insurance.

## St. Ambrose Church To Hold A Picnic

Will be Held at Fred Smith's Next Sunday Afternoon

The members of St. Ambrose Church are holding a congregational picnic at Cherry Grove on Sunday next after the morning service to which all the congregation is invited. Cars will leave the church at about 12:30 and will proceed to the picnic ground where lunch will be served. Supper will be served at 3:30 in the evening, followed by Evensong. Cherry Grove has been kindly lent for the occasion by Mr. and Mrs. Fred Smith. Those attending the picnic are asked to bring enough lunch for two meals, and those having cars are asked to bring them so that everyone may have an opportunity to come. Tea, sugar and milk will be provided.

## Govt. Breaks Even In Bye-Elections

Lost Stronghold To Labor But Win Liberal Stronghold

Two Dominion bye-elections were held last Monday; one in Hamilton, Ont. and the other in Three Rivers Que. In the latter the Conservative candidate, Chas. Bourgeois, won out. This seat has been held by the Liberals for the past 31 years by majorities hovering around 4000. In Hamilton, the Conservatives lost an old stronghold to H. S. Mitchell, the Labor candidate who won by a substantial majority.

Teddy Waloff left on Saturday for the Ellis ranch where he will be the guest of Graham Ellis for a few days.

## Churches

### ST. MARY'S CHURCH

Celebration of Mass every Sunday of each month except the first Sunday, at 8:30 a. m.

ST. AMBROSE CHURCH  
Rev. Malcolm Stewart, Vicar  
Sunday, Aug. 16th, 1931  
11th Sunday after Trinity.  
8 a. m. Holy Communion  
11 a. m. Choral Eucharist  
After the Choral Eucharist the congregation will leave for Cherry Grove where a picnic will be held. All members are cordially invited to come. Please bring enough food for lunch and supper. Evensong will be sung on the picnic grounds. Tea, sugar and milk will be provided.

### GORDON MEMORIAL NITE CHURCH

Pastor - Rev. R. E. E. Pow  
Subject: Christ's Table-Talk.  
10 a. m. Church School  
11:15 a. m. Morning worship  
Sunday, Aug. 16th, 1931  
3 p. m. Bowell.  
No evening service.

"Indolence - Freedom from anxiety or grief, is a virtue, a wholesome state of mind."

### CHURCH OF BRETHRY

The Brethren church has been closed indefinitely.

## Liberal Predictions Were Far From Right

Conservative Have Gained in Popularity in Canada

It appears like only a few short years ago since Liberal papers and politicians were informing the public that the once great Conservative party in Canada was rapidly losing ground. That its platform, its policies, its leaders and its ideas were so antiquated and unpopular that it would be a matter of only a few years until the party would sink into oblivion; "fade away and gradually die," as it were.

It is true that at the time these predictions were made the Liberal party was enjoying a momentary degree of success both provincially and federally. Conditions today, however, show that the prognosticators of only a few years ago could not have predicted anything more foolish. During these few years the come-back of the Conservative party has been one of the most sensational in the political history of this country.

Today there is a Conservative government at Ottawa, and in six of the nine provinces. Two provinces have farmer governments and only one is Liberal. From the way the political pendulum is now swinging it would not be very extravagant to predict that by the time the next Dominion general election rolls round, at least eight of the nine provinces will be in the Conservative column. This does not look much like a dying party. However we are not making any predictions. Old Sir John used to say: "nothing is so uncertain as elections and horse races."

## Guarantee 35c Initial Payment on Wheat

This Does Not Include The Five Cent Bonus by Gov't

Initial payment of 35 cents a bushel to those wheat growers who enter a voluntary pool, the operation of the 1,100-odd country and terminal elevators owned by the three Prairie Wheat Pools as "private" concerns, Government action looks towards the orderly marketing of the 1931 crop, and a definite assurance that panic conditions will not be permitted to control prices this year, constituted the outstanding features of a statement issued by Premier Bennett last week end when giving his intentions after consultation with the prairie premiers.

The five-cent bonus, previously sanctioned by parliament is not included in the 35c initial payment.

## AMPLE CREDIT FOR THE WHEAT POOLS

Premier Brownlee states that the financing of the wheat pools has been arranged in such a way that an ample line of credit is provided for without postponing the provinces mortgage security. This has been made possible. Mr. Brownlee said, through the assistance rendered by the Dominion government.

A round half the world in 17 days. London to Vancouver by way of Canada and Montreal by boat train where the land of the Canadian Pacific. Miss D. Bewley, of London, Ontario, is the first woman to make the trip. She is the daughter of the Canadian Pacific. Miss D. Bewley, of London, Ontario, is the daughter of the Canadian Pacific. Miss D. Bewley, of London, Ontario, is the daughter of the Canadian Pacific.

Quebec July 13 on the new Empress of Britain, was the Imperial Limited for Vancouver. The Empress of Britain, was the Imperial Limited for Vancouver. The Empress of Britain, was the Imperial Limited for Vancouver.

## Over a million packages sold each week

'Fresh from the gardens'

### Where Are We Astray?

Out of the present world depression god will eventually come. This prediction can be made with absolute confidence and certainty of fulfillment because lessons are being learned and the need for reforms being demonstrated which will force action resulting in the application of remedies.

But at the present moment if the question is asked: What reform is most imperative, what action should be first taken, there are almost as many answers as there are people. There is no agreement as to what has caused world conditions; there is even less agreement as to the course of action necessary to remedy conditions and prevent a recurrence of depressions. Manifold in its world relationships must have violated some of the fundamental laws of Nature to have brought down upon itself such a world calamity, but if so, no one appears to be able to put their finger on the spot and declare authoritatively: "There lies the trouble."

All of which leads to the thought and the question whether our much vaunted systems of education are not very much at fault in the very foundations upon which they are erected. Much thought is expended upon the devising of a curriculum, in the preparation of text books, in the academic training of teachers, and hundreds of millions of dollars are expended in school buildings and equipment of all kinds. This has been going on for generations, yet when a world condition develops such as we are now experiencing, and from which we all suffer, the thinking of the world is confused and muddled. "Blame" is heaped upon teachers, leaders in all branches of industry, all are at sea; all running around in circles, one advancing this theory as a solution only to be met by another absolutely contrary theory. No one seems to stand on solid ground, able to advance a clear case or an incontrovertible argument.

What is the basic cause of all this confusion? It is not to be found in the fact that in our educational methods we have failed to ground our people in a true knowledge and acceptance of the immutable laws of Nature, failed to teach people to think, and to think straight, with the result that the world has been devising and trying out all kinds of artificial man-made devices and experiments, many of them in open defiance of Nature's laws, instead of remaining true to them.

Have we not in our educational systems devoted time and energy on many fronts; have we not emphasized a narrow, even boastful nationalism; have we not placed a premium on the so-called higher education and the securing of degrees too numerous to mention, but failed to educate men and women to really think, to accurately weigh and rightly gauge the verities of the world in which we live in the full light and knowledge of those laws of Nature, ignorance and violation of which mean suffering, loss and disaster?

To illustrate: Let any two men meet and begin a discussion of present day conditions, and where does the conversation lead them within a few minutes? They begin by discussing wheat, its price, the marketing of it, whether there is over-production or under-consumption, the effect of Russia's "Five-Year-Plan" on Canada and the world, and at once they are attempting a discussion in political economy. Possibly they start by talking ordinary partisan politics, and at once they are into a discussion of tariffs, Protection versus Free Trade, currency and banking, trade, free markets—in a word, political economy. "Taxation is the subject." They are agreed it is excessive, but there agreement ends. One man favors this method of raising necessary revenues; the other has directly opposite views. Again it is political economy. Or possibly they begin a discussion of religious creeds or the racial origin, characteristics, and emigration of people—and they land in political economy.

But how many understand political economy which is affecting every nation, every home, every life today? What have our schools really taught us about it? Practically speaking, nothing. It is left as a study for the limited few who reach the higher grades of schooling and receive a degree, and even then it is the odd one who obtains more than a hazy idea of it.

Notwithstanding this universal ignorance of even the primary principles of the subject, we are today all talking, or attempting to discuss, political economy. The present depression has made it the current topic of conversation, the language of the street, the office and the home. And what do we know about it? How profoundly ignorant we are. And because of this universal ignorance, every quick proposal, every quack idea, gets a hearing, and in various quarters acceptance as a cure-all for our troubles.

The question presents itself: Should the study of political economy not be made the most fundamental of all studies for the youth of today, the young men living in the lower grades and continuing through our educational system? Let us study the verities of life; above all let us teach and train the coming generation along more practical lines, and instead of striving to cram a vast amount of information on certain given subjects into their young minds, ground them in the truth and beauty of Nature and Nature's laws and then train them to think for themselves and apply those laws in every activity of life, individually, nationally, internationally.

#### Furnace Estate For Sale

Glenora, Lord Strathcona's famous estate in Scotland, is for sale. It covers more than 75 miles, its boundaries stretching 22 miles from Loch Leven to Harnock. Glenora was the scene of the 1862 massacre of the MacDonalds. The estate is the property of the late Lord Strathcona, who was given, in the property.

#### Of No Importance

Social Visitor: Of course, closing the saloons has raised your husband's standing in the community. Mr. Dooley: Sure, sir, it's the other way, mum. In the old days Mike was pointed out by everyone as the village drunk, but now you'd think he was just nobody.

Vegetable oils are said to be a good fuel for some Diesel engines.

## The Mother of Seven Children Used It for Diarrhoea

Mrs. Ray Dinkwater, R.R. No. 2, Hagerville, Ont., writes:—"I am the mother of seven children, but had none of them until I was 37 years old, when I was taken very sick with diarrhoea, and I thought she was dead. My husband went 7 miles to see what my sister had given her baby, and he came home with a bottle of Dr. Fowler's Extract of Wild Strawberry. I gave the child a few drops and she was soon well again. The next morning she had diarrhoea at the same time and I gave them 'Dr. Fowler's' with the same result."

#### Well Fortified

"We are going forty miles an hour. Are you game for another ten?" said a motorist to his companion. "Yes," she replied, as she swallowed another mouthful of dust, "I'm full of grit!"

Fossil monkeys found in Holland indicate that the climate of that country must have been warmer at one time, in the geologic past.

### Millions For Relief

300,000 Persons Given Employment Through Public Works Expenditures throughout Canada on public works arising out of the \$20,000,000 unemployment relief grant made by the Dominion Government in the special session last fall had reached a total of \$70,000,000 at the end of June. A statement issued by the labor department shows 300,000 persons were given employment with a total of 1,637,000 man-days of work.

By provinces the division of expenditures was: Prince Edward Island, \$200,000; Nova Scotia, \$2,338,000; New Brunswick, \$1,450,000; Quebec, \$10,064,000; Ontario, \$18,556,000; Manitoba, \$2,563,000; Saskatchewan, \$2,900,000; special relief for drought areas in Saskatchewan, \$1,014,000; Alberta, \$2,830,000; British Columbia, \$3,423,000.

In addition the Canadian National Railways carried out work amounting to \$14,113,000, the Canadian Pacific Railway, \$11,014,000, and \$2,465,000 was spent through the grade crossing fund.

Up to the end of June, 83,000 families had been helped by the relief. Where returns were made to the department on the basis of persons receiving relief, unemployment was provided one-quarter by the Dominion, one-quarter by the provinces, and the balance by the municipalities.

### Peace Motion Tabled

Proposal of Miss Agnes MacPhail Disappeared By Committee

Proposal of Miss Agnes MacPhail, Progressive member for South West Grey, to establish professorships and scholarships in Canadian universities to promote peace was disappeared in a report by the industrial and international relations committee tabled in the House of Commons.

The committee had under consideration a resolution by Miss MacPhail that "in the opinion of this House, the cost of every \$100 spent on war, one dollar should be spent to promote peace by instituting international professorships and scholarships in the leading Canadian universities."

Persian Balm is Irresistible. Fragrant as summer flowers. Cool as a breeze. Softens and whitens the skin. Makes skin soft-textured and youthful. Used by women as a powder base and as a perfume aid to lovely complexion. Used by men as an effective hair restorative or shaving lotion. And for children, it soothes and protects their tender skin. Use the delicate cool Persian Balm.

#### Willful To Oblige

A Philistine man called up his birdhouse the other day and said: "Send me 30,000 cockroaches at once and I'll oblige you."

"What in heaven's name do you want with 30,000 cockroaches?" "Well," replied the householder, "I'm moving today and my lease says I must leave the premises here in exactly the same condition in which I found them."

Poison ivy is not ivy at all, but was so-called by Captain John Smith who encountered it, with unpleasant results, and thought it resembled the English ivy.

A Spaniard introduced tobacco into Spain from the West Indies in 1550.

### Will Erect Seadromes

Trans-Atlantic Air Lines Soon To Be In Operation

The first of eight seadromes, proposed man-made islands to dot the Atlantic at intervals of 500 miles, between the United States and Great Britain, will be constructed at the coast of United States east spring, end of June. A statement issued by the naval department shows 300,000 persons were given employment with a total of 1,637,000 man-days of work.

By provinces the division of expenditures was: Prince Edward Island, \$200,000; Nova Scotia, \$2,338,000; New Brunswick, \$1,450,000; Quebec, \$10,064,000; Ontario, \$18,556,000; Manitoba, \$2,563,000; Saskatchewan, \$2,900,000; special relief for drought areas in Saskatchewan, \$1,014,000; Alberta, \$2,830,000; British Columbia, \$3,423,000.

In addition the Canadian National Railways carried out work amounting to \$14,113,000, the Canadian Pacific Railway, \$11,014,000, and \$2,465,000 was spent through the grade crossing fund.

### Australia's New Stamps

Unique Design Commemorate World Flight Of Kingfisher-Smith

After some delay Australia has issued the Kingfisher-Smith stamps to commemorate his world flights. The set consists of a two penny red, and a three penny blue. There is also a six penny deep mauve, issued for air mail service. Each of the three stamps have the same design, an aeroplane flying between the two hemispheres, with the inscription "Australia" at the top of the stamp, and "Kingfisher-Smith's World Flight" at the bottom.

The stamps are in small oval tablets in the lower corner, and the word "postage" at each side. The only difference in the air mail stamps is that instead of the words "postage" on each side, the words "Air Mail Service" are inscribed. When these commemorative stamps were placed on sale in Melbourne the six penny air mail was bought so heavily, that the supply was exhausted within fifteen minutes.

### An Unusual Convention

Four Hundred Diviners Of Water Attended Meeting In Italy

Four hundred diviners, including professors, physicians, priests, workmen and several women attended the first congress of rheumatism—divining of water, precious metals, etc.—in Verona, Italy, recently. In order to test the diviners' capacities, a commission of engineers dug nine holes ten feet deep in the municipal stadium and buried in them metals and pipes containing running water. Armed with rods, willow, or metal, the diviners discovered all the spots. Professor Mercati, of the Rome University, declared that he was so sensitive that he was obliged to wear rubber-soled shoes to avoid disturbing vibrations when he was walking about.

A Power Of Its Own.—Dr. Thomas' Electric Oil has a subtle power of its own. All who have used it know its value and keep it by them as the most valuable of all household remedies. Its uses are innumerable and for many years it has been printed as the leading liniment in homes and hotels.

#### Fine Visit To Russia

Visas have been granted by the Soviet Government to George Bernard Shaw, Lady Nancy Astor, and a party of distinguished Britons who have announced their intention to visit Russia this summer.

### ABANDON PACIFIC OCEAN FLIGHT

Wheeler, who was flying from Vancouver for the current crop year will exceed 70,000,000 bushels according to estimates of the Vancouver Merchants' Exchange. For the present crop year to June 31, a total of 65,000,000 bushels were moved, compared with 43,017,181 bushels for the corresponding period a year ago.

"We are going forty miles an hour. Are you game for another ten?" said a motorist to his companion. "Yes," she replied, as she swallowed another mouthful of dust, "I'm full of grit!"

Fossil monkeys found in Holland indicate that the climate of that country must have been warmer at one time, in the geologic past.

Poison ivy is not ivy at all, but was so-called by Captain John Smith who encountered it, with unpleasant results, and thought it resembled the English ivy.

### Penalty For Nude Paraders

Three Years' Imprisonment May Be Imposed Upon Proposed Amendment

Three years' imprisonment for parading while nude may be imposed under an amendment to the criminal code which will be introduced in the House of Commons shortly by Hon. Hugh Guthrie, Minister of Justice.

The amendment is proposed with a view to putting a stop to nude parades by Doukhobors of western Canada. It is comprehensive in its character. In the first place it provides a penalty of three years on summary conviction for nude paraders. The same penalty may be imposed on anyone found nude in any public place, found nude on private property not their own, or found nude on their own property exposed to public view.

The term "nude" is defined in the amendment as being so scantily clad as to be indecent.

### Utilize Muskeg Vegetation

Edmonton Firm Manufactures Building Insulator Material From Muskeg Litter

Commercial utilization of muskeg vegetation, plentiful enough in Northern Alberta, is soon an immediate probability following the development of a new building insulator called "Muskeg" by two Edmonton men, Al Edmondson lumberman, J. Victor Carlson, and his son Arthur V. Carlson, are slated by the Edmonton Journal to have perfected a process by which ordinary muskeg litter is transformed into the quality of insulation material. Experimental work is stated to have advanced sufficiently for the new product to be offered to the building trade.

### Stimulate Fishing Industry

Hon. D. C. McGeach, Minister of Mines and Natural Resources in the Province of Manitoba, is personally visiting fishing settlements along Lake Manitoba collecting data concerning the problems with which the men engaged in the fishing industry are being faced and to formulate plans for putting the fishing industry on a better basis.

Remove all callouses and enlargements from your stock with Douglas' Eucalyptus Liniment. A wonderful remedy.

#### Credit For Unemployed

Pending the commencement of unemployment relief work on a large scale in British Columbia, the provincial government has instructed government agents and provincial police in all outlying districts to give all persons who need food, credit of 40 cents a day at local stores. The allowance will apply to women as well as men.

### Russian Trade With Russia

Export Credits To Be Extended For a Period Of 30 Months

In a move to increase British exports to Soviet Russia, the British Government announced Thursday, July 9, 1931, through William Graham, president of the Board of Trade, that export credit will be extended for a period of 30 months instead of 24 months as at present.

This arrangement will be limited to heavy engineering products. The British move has resulted from other European countries, notably Italy, having extended their export credit schemes for Russia to 30 months.

The announcement, made in the House of Commons, disposes of reports in the British press in the last few days that the Labor Government planned to extend a new credit of approximately \$30,000,000 to Russia. It was learned authoritatively that British export credit arrangements for Russia remain unchanged except in relation to the extension of time limit. The 30-month limit includes the period of manufacture.

### A Live Stock Safeguard

Restrictions Placed On Importation Of Stock From Countries Infected With Foot and Mouth Disease

With official confirmation of outbreaks of the dread foot and mouth disease in England, Scotland and Ireland, it has become necessary for the Dominion Department of Agriculture to exercise the powers conferred upon it under and by virtue of the Animal Contagious Diseases Act, and cancel all permits issued for the importation of cattle, sheep, goats, and other animals, and swine from countries infected with foot and mouth disease. While shipments actually authorized as on the date of the official order, June 20, 1931, will be allowed to proceed to Canadian points, the issue of permits has been held up for an indefinite period.

A pleasant medicine for children is Mother's Own Worm Expeller, and it is excellent for driving worms from the system.

#### New System Disclosed

Discovery of a new small-pox serum was announced recently by the British Medical Research Council, reporting the researches of Professor William John Tulloch and Dr. James Craigie. The serum enables a definite diagnosis in early stages of suspected small-pox, when the symptoms are otherwise doubtful.

## REMNANTS

Film Actor: Look here, if he's going to throw me into the rapids, how am I going to get out?"  
Director: "Oh, that's all right. You don't appear again!"—The London Opinion, England.

## WORLD HAPPENINGS BRIEFLY TOLD

Eight Russian army officers were killed in an airplane accident near Alabino, 30 miles west of Moscow.

Edmonton land sales for the first quarter this year amounted to \$15,000 more than for the same period last year.

In Parliament Prime Minister Bennett said he did not expect to hold the position of Finance Minister at the next session.

Air mail contracts of which expiry notices on July 15 were issued by the post office department several weeks ago, have been extended until August 15.

Charles A. Lindbergh has been granted permission by the radio commission to operate a transmitter aboard his airplane on his projected flight to Japan.

Jute factories in Dundee, Scotland, are at work making a million sugar sacks. The sacks have been ordered by the government and are to be completed by December.

Organization of self-contained inner camps in the north of Canada was proposed in a resolution passed at Hamilton by the central branch of the Canadian League.

Announcement is made of the appointment of Lieut.-Gen. Arthur G. Wauchop to be high-commissioner in Palestine, succeeding Sir John Chancellor, who recently resigned.

Appointment of H. E. Beresford as assistant director of surveys for Manitoba and Alfred Bedford Howell as chief game guardian have been officially announced by order-in-council of the provincial government of Manitoba.

## Strange News From Holy Land

22,000 Horse-Power Plant To Supply Electrical Energy In Biblical Towns  
Here is strange news from the Holy Land. The first hydro-electric plant on the River Jordan south of the Sea of Galilee will soon be in operation. It was built partly by American capital and by next year its 22,000 horsepower plant will be supplying current to such biblical towns as Jaffa, Haifa, Nazareth and Beersheba. Meanwhile the British are building a generating plant that will supply Jerusalem, Bethel and the surrounding region. Before long the mountain streams of Lebanon will be producing 51,600 horsepower.—World's Work.

## Barley In Canada

Barley is the hardest of all cereals and can be grown under a greater range of climate than any other. Its production dates from the most ancient times when it was used principally as an article of food, but as the years progressed the use became varied. The production of barley ranks third among the cereal crops of the Dominion in acreage and total yield and second in average yield per acre.

Preserving Our Scenic World  
To preserve some share of the wild places of the land in their primeval condition is the object of the National Parks of Canada.

"We will be married on Saturday." "Impossible. I am playing football that day."—Bass Humor, Madrid.

W. N. U. 1899

## History Of The War

Official History Of Canada's Part In Great Struggle In Order Preparation

No date can be given at present as to when other volumes of the official history of Canada's part in the great war will be ready for publication, according to a reply given in the House of Commons by Hon. D. M. Sutherland, Minister of National Defence, to a question asked by H. E. Spencer (17-A-1, Battle River).

It is not known how many other volumes will be published. The content of these is included in the duties of the historical section, general staff.

"As it is now ten years since the above order-in-council (P.C. 1852) was passed, authorizing the history to be written, how much of said history is now actually written other than the history of the medical services; and when it is anticipated that other volumes will be issued?" Mr. Spencer asked.

The minister's reply was: "In addition to the heavy printed work of collection, classification and co-ordination of relative documents and material, which is well advanced, the following progress has been made:

- (1) "The plan for all the general volumes has been laid out;
- (2) "The material for four of them has been selected and arranged;
- (3) "One hundred and four detailed maps of operations required for illustration, showing units down to squadrons, batteries and companies, have been compiled from original documents;
- (4) "The draft text of approximately one-quarter of these volumes has been written."

## Many Are Applying For Naturalization

In Order To Take Up Land In Northern Saskatchewan  
More than one hundred applications for naturalization have been received at Regina courthouses. These will be heard by His Honor Judge Hannon in September and November next.

It is understood that the main reasons for this unusually large number of naturalization applications is the steady flow of farmers from the dried out areas of southern Saskatchewan to the northern part of the province. Many of these farmers have never become naturalized and have been informed by the Department of Natural Resources that they must become naturalized in order to take up land.

Provincial land regulations which came into effect March 1, 1921, require that a man must be a British subject and have been a resident in the province four years immediately in a position to take up land.

## Communicating With Planets

Nicola Tesla Discovers Means Of Transmitting Energy From One Planet To Another  
Nicola Tesla, the inventor, in an interview on his 70th birthday, said after years of research he had discovered a means of transmitting thousands of horsepower of energy from one planet to another, which he would open the way for inter-planetary communication.

"I feel," he said, "that we are near the period when the human mind will perform greater wonders than ever before. This is due to the constant refinement of means and methods of observations and the ever increasing degree of perception."

## Noted Chemist Dead

Sir Charles Bedford Was Once Technical Adviser To Indian Government  
Sir Charles Henry Bedford, distinguished chemist, died at his home, July 8, at the age of 65.

He was technical adviser to the Indian government for many years on chemical affairs. He founded the King Alfonso chair of Spanish studies at Oxford University and the Anglo-Spanish and Spanish-American Institute in London, England.

Scotland's Population Is Less Preliminary census returns for Scotland show a fall from 4,882,000 in 1921 to 4,842,000 now. This is the first time a decrease in Scotland's population has been officially recorded, and migration is given as the reason. Gaelic speakers number 137,600, of which 7,000 cannot speak English.

"Keep hold of the cord of laughter's bell. And avoid the tones that jar; The sound of a sigh doesn't carry well. But the lift of a laugh rings far."

Some of the textiles made in prehistoric Peru rank among the finest that have ever been produced.

Eligible refrigerating plants are to be built in Italy.

## Passing Of Trader Moberley

Was Link With The Very Early History Of The West

J. Moberley, better known as "Trader Moberley," is dead. Apparently in good health, Mr. Moberley was waiting about a few days ago. The end came after a very brief illness, death being attributed to old age. Mr. Moberley being 80 years of age at the time of his death.

Known internationally for his book, "When Fur Was King," Mr. Moberley is believed to have been the only remaining commissioned officer of the old Hudson's Bay Company. He served the company from 1854, when he came west with Sir George Simpson, then governor of the company, till his retirement in 1880 when he was factor at Ile a la Crosse Pass.

Born in Barrie, Ontario, Mr. Moberley was the son of a noted captain in the British navy. His father fought in the war of 1812. Prior to joining the Hudson's Bay Company, Mr. Moberley was employed by the famous British firm of Lloyds and in their service he visited Havana, Cuba, and St. Petersburg, Russia.

He commenced his service with the Hudson's Bay Company as clerk at Norway House under Chief Factor Rowland. Edmonton was his first post and afterwards he was moved to Fort McMurray, later opening up Jasper House as a trading post for his company.

At the time he was in charge of the posts at Fort Vermilion and Peace River, and established the Post-McMurray post in the early 70's. He was in charge of transports at Peace River and carried supplies ahead of the Earl of Southesk in 1859 when the Earl engaged in a hunting trip through Canada. Prior to taking charge of the Ile a la Crosse post, the veteran trader was stationed at Stanley Mission on the Churchill in northern Saskatchewan.

## Houses Good Sized City

Thousands Work On Live In Empire State Building Near York  
One of the biggest houses in the evergrowing world is the Empire State Building of New York. It is a huge structure of steel and brick and is 86 stories high. About 25,000 people live or work in it. The average passenger lifts for the 86 stories and three kinds of express lifts. Some of these lifts run at a speed of 1,000 feet an hour. The passenger goes up to the nearest stopping floor to his and then transfers to a slow lift which takes his journey on an escalator, or which there are nearly a hundred lifts entirely for goods are always in busy use.

## Use Plans To Locate Minerals

The scripples will be employed by Professor J. B. Macdowell of the University of Saskatchewan in locating and charting mineral resources in Northern Saskatchewan. Investigation of areas of schist and greenstone presenting favourable prospects for metallic minerals will be made.

In catfish families, the father fish assumes the care of the young.

## Recipes For This Week

(By Betty Barclay)

## LEMON EGG-NOG

(Serves 1)  
6 tablespoons milk.  
1 cup cold water.  
1 egg.  
2 tablespoons sugar.  
2 tablespoons lemon juice.  
Greeted mixture.  
Combine milk, water, egg and sugar. Beat thoroughly, pour in lemon juice and mix vigorously. Serve in a large glass topped with a grating of nutmeg.

## HONGKONG CHICKEN

2 cups cold cooked chicken, diced.  
1 cup celery, diced.  
2 onions, sliced.  
1 cup crushed pineapple, drained.  
1 teaspoon sugar.  
Salt and pepper.  
1 tablespoon butter.  
Brown the celery and onions in the butter. Add the other ingredients. Heat well. Serve with fried noodles.

## Manitoba Gold

Province Likely To Replace Yukon As Fourth Producer In Canada

Gold production in Manitoba for the first four months of the year exceeded the total output for 1920 by a substantial amount, and at the present rate of production the province is likely to replace the Yukon as the fourth producer in all Canada. Manitoba's gold output for the first four months of 1921 amounted to 35,728 ounces valued at \$720,240, or at a rate well in excess of two million dollars annually, as compared with an output of 32,189 ounces valued at \$479,259 for the whole of 1920.

More than \$6,000 was collected in one day recently in Edinburgh for the Scottish lifeboat fund.

## Funds For Alberta

Settlement Of School Lands Case Is Satisfactory To Province

Close to ten million dollars in provincial assets, with nearly a half million a year in interest for three years, will be coming to Alberta as a result of the settlement of the school lands funds case. Hon. R. G. Field, provincial treasurer, has been advised from Ottawa that the Dominion Government has issued a three-year debenture for \$2,964,568, bearing interest at 5 per cent, until July 1, 1924, payable in half-yearly instalments.

The debentures thus issued to Alberta's credit represents accumulated principal moneys from the sale of school lands since the organization of the province in 1905. All funds from this source have heretofore been handled by the Dominion, which has retained the principal and paid interest to the province. With the transfer of the Natural Resources from Dominion to Provincial control the school lands funds now pass to the province as part of the public domain.

Negotiations leading up to this settlement have been under way for a considerable time past. The conclusion now reached is regarded as highly advantageous to the province, and will enable the province and the Treasury Board express themselves as well pleased with the outcome.

## Worked In A Circle

Teacher—"Why are days longer in summer than in winter?"  
Tommy—"Because the sun shines longer."

Teacher—"Yes, but why does the sun shine longer?"  
Tommy—"Because the night is so much shorter."

Cob is an old name for spider, because the origin of the name cobweb.

Baseball is popular in Argentina this year.

## Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

## WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE  
MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

USE WINDOLITE IN BROODER HOUSES LAYING PENS DAIRY BARN SUNROOMS ETC.

CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

51 Wellington St. W. TORONTO, ONT.

## Revolution In House Building

Beston Architect Foresees Buildings Of Metal Or Glass

What kind of houses will our children build?

Something radically different from anything the world has yet seen, says Dana Somes, Beston architect on the board zoning adjustment.

No one will build a house in the city in another 25 years, Mr. Somes declares. People will live in a type of house not yet conceived.

A house of metal plates is installed—heated with electricity or gas—built on mass production principles, as automobiles are now built, so that anyone who can own a small car can own his house. This is his idea.

The house of the future, says Mr. Somes means the near future, the next decade or two, will be based on garbage collection, on automatics or even on sewerage systems, he suggests. Chemical reaction, or perhaps a death ray, will take care of all wastes of the household.

"Germany is testing out glass and copper structures," he says. "New materials are being developed for building every day. We have only begun to see the possibilities of aluminum and other light metal for construction."

"Some strongly-financed organization presently is going to use the opportunity in doing with houses what the big automobile mergers have done with automobiles. Great housing corporations will begin by finding and developing the land, planning and building and financing homes so that they can be bought on easy terms."

"By putting mass production methods to work for the building of houses for \$2,000 and \$3,000 and accept payment on very easy terms."

"Such a house-building corporation will set up service stations around the country and send out an erector crew any day to put up a house—its 'A' house of the future, or their double 'A' house, if you want to enlarge it—built according to plans that the home owner can select how he will select wallpaper today."

"I'm not talking about portable houses, but permanent houses, built by the modern principles of mass production and with modern materials and construction technique already applied in large commercial construction."

"We still build houses just as we built them 150 years ago. On the small house it's never been worth while for anybody to undertake a modern plan of construction. But it is going to be worth while for the corporation that develops a workable and popular proposition."

## Alberta Honey

Big Production From 150,000 Colonies Of Bees

This season promises to be an excellent one for honey production, and present indications are that the crop will exceed that of 1930, according to George Hiddell, of Hiddell's Honey, Limited, who has 150,000 colonies of bees out in the Taber, Barrow and Cascade districts, Alberta, and whose apianists last season yielded 175,000 cartons or 350,000 pounds of honey.

Portals For Government To a ceremony attended by members of the government and the opposition, a portrait of Senator Roper Dandurand has been presented to the government of Canada. The portrait is to mark the participation of this country in the work of the League of Nations. Senator Dandurand was delegate to the league in 1924, president of the league assembly in 1925, and for some years later a member of the council.

A doctor suggests that, of the many people who disappear every year, some are actuated by the belief that they are not wanted by others, or, in doubt, by the knowledge that they are.

## To Supplement Pasture

Even with milk and butter-fat at the lowest level in years, there are dairymen who consider that it pays to graze the good cows on green grass and to supplement the pastures with silage or other feeds and they commiserate to get short. The lower the price, the more a cow milk produces in order to show a profit.

## Ceylon Women Talkers

People of Ceylon want talking pictures and nothing else. Even the natives who do not understand a word of English are in a favour of the speaking screen. When films are shown, they are always shown in a room recently, natives and Europeans protested vigorously.

## Danish Crown Jewels Are Well Guarded

Tourists Get Bad Scare While Inspecting Valuable Collection

The tale of those who tamper with the crown jewels of Denmark was revealed to a party of foreign tourists. The tale of those who tamper with the crown jewels of Denmark was revealed to a party of foreign tourists. The tale of those who tamper with the crown jewels of Denmark was revealed to a party of foreign tourists.

An attendant drew his revolver and commanded everyone to stand where he was. Carloads of police who had been summoned instantaneously rushed in on fast cars and surrounded the castle.

Explanations finally resulted in the party being released and the tourists departed with respect for the efficient system of guarding the country's treasures.

## Removes Tariff On Canadian Newspaper

British Columbia Pleaded With Action Of Australian Government

Announcement of the removal of the tariff duty of \$2.50 on Canadian newspaper was received with keen satisfaction by the British Columbia Government. British Columbia has been the entire benefit from this change since it ships most of Canada's paper products to Australia.

Showing the extent of this movement of newspaper and general paper products to Australia, the value given for last year's exports from Canada to the commonwealth was approximately \$1,000,000.

This business has more than tripled since 1925. The tonnage of newspaper shipped from Canada to Australia last year from British Columbia was \$2,000,000, having increased steadily in recent years from a little over \$500,000 in 1925.

## New Hospital In North

Nurse and Matron Leaving For Pungitong in British Columbia

A journey north to Moose Factory by rail and canoe to Carleton Place, and a month's voyage to Pungitong on Indian Island by the steamer "Ugavag" faces Mrs. Carol Sauter, of Ottawa, who is visiting friends in Montreal. Mrs. Sauter will be accompanied by Miss Prudence Hicken, of Winnipeg, a trained nurse. They will open a new Anglican hospital at Pungitong, which Mrs. Sauter will act as matron. The physician who will be its medical director is already in the district. Mrs. Sauter has been matron of the Indian residential school at Moose Factory for the past three years. She was formerly assistant matron at an institution at Saint Ste. Marie, Ont., for five years.

## A Highly Sensitive Instrument

Overcomes Difficulty Of Interfering Between White and Nearly White Substances

The eye, extraordinarily sensitive to differences in color, can be expected to give great difficulty in discriminating between white and nearly white substances. To this end, an instrument has been designed wherein the eye of the observer has been replaced by photo-electric cells, which enable the instrument to measure accurately the extremely small difference between "white" surfaces. By this means differences imperceptible to the eye of even a trained observer can be detected.

## May Alter Theory

Discovery of an Indian arrowhead by scientists in the Buffalo Museum of Science while digging in Indiana for the skeleton of a mastodon, may alter the belief that mastodons have been extinct for many thousands of years. The scientists said the discovery of the arrowhead in connection with charcoal and the burned stump of a tree which were uncovered in the same stratum makes it possible that Indians killed it for food.

## 360,000,000 Pounds Sold In Canada

During Month Of April

Branded beef sold in Canada during the month of April reached a total of 1,363,223 pounds, according to information received from the grading service of the Dominion Department of Agriculture. Of this total, 235,247 lbs. were branded blue, and 649,775 lbs. branded red. By provinces, the gradings were: British Columbia, 181,500 lbs.; Alberta, 220,750 lbs.; Saskatchewan, 144,462 lbs.; Manitoba, 315,320 lbs.; Ontario, 726,285 lbs.; Quebec, 285,000 lbs.

## Persian Women Hurry Clock

"Burst" of the traditionally worn chador, or cloak, and veil, was performed by 2000 women at Tehran, Persia, recently. A grave was dug and the clocks were placed in it under the epithet: "Here lies the clock, the emblem of women's servitude. God's curse be upon it." The ceremony is in line with the decree ordering the westernization of dress for men and women made by Reza Khan, the soldier who became Shah of Persia.

## Transfusion of Blood From one human to another became a practical and safe procedure in 1901 when Dr. Karl Landsteiner discovered what are called the four blood groups

"We think we have found your mother-in-law who has been missing for six months."

"Miss Smith, do you sell?"

"Nothing."

"Then it is not my mother-in-law."

—Pages Gain, Yverdon.

## The Soya Bean

Trade Commission Believes Crop Could Be Profitably Grown In Western Canada

Western Canada may find a way out of its depression through growing a Manchurian crop—the soya bean—which will not only bring prairie farmers handsome prices for the oil extracted, but will provide a by-product an excellent cattle fodder to help build up the prairie's best industry, according to the opinion expressed in Montreal by Col. J. M. Congrave, Canadian trade commissioner to China.

"The soya bean," Col. Congrave declared, "is grown extensively in Manchuria, where the climate is almost exactly that of the prairie provinces. The bean lends itself to machinery cultivation and harvesting, and Canadian farmers should be able to produce it at a price very much competitive with that of the Manchurian growers who are still dependent upon hand labor."

## Makes Strange Discovery

Shipper Finds Recent Earthquake Raised Bed Of North Sea

The bed of the North Sea was raised several hundred feet by the earthquake which shook England early on the morning of June 7, according to a report by the Daily Express which attributes the discovery to the skipper of the Norwegian steamship "Isefjord."

The paper said the skipper, who was sounding in the fog 29 miles off Scarborough Head, was surprised to find the depth to be half that of what was shown on his chart. Further soundings revealed a ridge of light eight miles long apparently raised by the earthquake.

## Air-Drying Of Lumber

Normal Life Will Dry From Green To Air-Dry In About Six Weeks

A careful study of the drying rate of white pine conducted by the Forest Products Laboratory, Department of the Interior, disclosed the fact that a normal piece of one-inch lumber will dry from green to air-dry condition about six weeks under summer conditions such as existed in the summer of 1930. Lumber in the top zones of the pile dries much more quickly than the bottom sections, so that in the latter case being some times as much as four weeks behind the top. The side zones dry more quickly than the middle zone.

The number of millionaires in Britain has fallen from 601 to 487 in five years.

An apparatus for measuring the warmth of an overcoat has been devised.

More candy is being eaten in South Africa than ever before.

## The Grasshopper Menace

Active Measures Being Taken To Our Ravages Of This Pest

Advice received by the Department of Agriculture from field representatives indicate the grasshopper, menaces throughout Canada, is rapidly assuming serious proportions and an extensive campaign for its control is already under way in the provinces affected.

Grasshopper outbreaks appear to coincide closely with the drought period in the last crop cycle of 13 years. The last serious outbreak of the pest in the prairie provinces was from 1919 to 1924.

"While there is very little crop to be destroyed, at some places this year the presence of an abnormal number of grasshoppers makes it highly important that measures be taken to guard against a more serious outbreak next year," says a department statement.

"The grasshopper outbreak is fairly widespread throughout Manitoba and has assumed serious proportions in a large part of southern Saskatchewan and southern Alberta."

Governments of the prairie provinces are already taking active steps to distribute poisoned bait to farmers in the infested areas through municipal organizations and arrangements are being made to further curb the pest through suitable methods of cultivation.

## Timed Song Of Skylark

Average Length Is A Little Over Two Minutes

In the current issue of "Nature," under "Research Items," is the following reference to the length of the song of the wonderful British skylark. "There have been many opinions expressed as to the length of the song, time occupied by the song of a skylark. Opinions would have been fewer and more correct especially as they concern the skylark, if it were not for the fact that the skylark has been taken to time more than a thousand songs, as Noble Rollin did before writing a short paper on the matter. Variations in length occur according to the time of day, the month of the year, and the song of the bird themselves, so that the range runs from one to 30 minutes. But the average length was only 2.23 minutes."

## Increased Butter Output

Creamery butter inspections in Edmonton district showed an increase of 143 per cent. during May, stated W. J. Beckett, chief Dominion dairy grader at that point. The quality was good with 75 per cent. first grade.

St. Henry Thornton once wanted to be a bishop a writer reveals. Instead of taking orders, he achieved a position where he could give them.

## Retaining the V.C.

Important Changes Governing Military Medals Is Announced

Holders of the Victoria Cross, highest award for gallantry in Britain's armed forces, will not, in the future, be automatically deprived of the medal if convicted of "breach, conduct, felony or any other infamous crime," as has been the case in the past. This important change is one of the new provisions governing military medals announced in the London Gazette.

It is stipulated, however, that the award of the V.C. may be cancelled by the King, who may also restore the decoration, if and when the recommendation for annulment is withdrawn.—From the Telegraph.

## Great Buffalo Increase

Total Increase In Canada Has Reached Over 200,000 Head

The increase of buffalo in Canada's National Parks since the inception of the main herd in 1905 has been little short of phenomenal. From an original herd of less than 500, the total number has reached over 30,000, including the animals shipped to Wood Buffalo Park in the North West Territories and those otherwise disposed of. There are at present about 5,000 head at Buffalo National Park, Wainwright, Alberta, and 1,000 head at Elk Island Park also in Alberta.

In these large fenced reserves the animals roam over sections of their natural habitat much as they did in the early days.

## Reforestation Measures

Artificial Planting Of Large Areas In British Columbia

Reforestation on a large scale is contemplated by the Government of British Columbia, according to Hon. N. S. Loughheed, Minister of Lands. He has announced that 5,000,000 acres in timber reserves, but, in addition, the Government is now investigating areas along the coast where it is able to the growth of Douglas fir. While natural reforestation must be dependent upon for the restocking of the most long-lived lands next year, for the first time in the history of the province, artificial planting, will be resorted to.

## Trails In The National Parks

Over 2,000 miles of saddle paths are maintained by the Department of the Interior in the National Parks in the Canadian Rockies. Leading to glaciers, mountain lakes, and magnificent peaks, they furnish the lower of the great outdoors with an infinite field for recreation and enjoyment.

## Fortune Teller: "There's a dark woman following your husband."

Client: "She'll soon get tired of that—she's a postman."

## Rome May Be Seaport

Big Italian Project Includes Immense Harbor And Canal To Sea

Rome has maritime ambitions and a project is now being considered which may make it a thriving seaport.

Plans for the immense, undertaking have already been submitted to the ministry of public works and the government is expected to further investigate its possibilities.

Unlike the existing projects to make Rome a seaport, the new plan calls for the construction of an island harbor or lake north of Rome to be connected with the sea by a canal large enough to handle immense vessels.

The artificial island basin will be formed by erecting a dam in the Tiber River and directing sufficient water into a valley north of Rome to make a navigable gulf. The port, to be called Mussolini Port, will be 20 miles in length.

The water from the Tiber after passing through the island lake, will pass through locks, so that the water level is sufficient to develop 200,000 horsepower of electrical energy. The ships entering the port from the sea will be met by frequent locks without difficulty, since the difference in level between the Tiber and the port is only 10 feet.

The difference in levels of the Panama Canal are 10 times greater than those required for the Italian project. The island port will be linked with Rome, only a couple of miles distant, by railroads and large trucking roads. Engineers sponsoring the scheme predict that it will make Rome a thriving seaport and will permit merchandise and passengers from all parts of the world to come directly to the capital by the sea route.

## A Unique Ice Saw

"Nautilus" Equipped With Device To Make "Ice Saw"

The submarine "Nautilus," which, under the command of Sir Hubert Wilkins, is to undertake a journey through the ice to the North Pole, is fitted with a unique ice saw, or device. The device will bore a man-sized hole through the ice, and the "Nautilus" will enable the crew to leave the submarine for observations, or, in an emergency, they will be able to "escape" the "ice" by the use of the device. The device will be used to bore a hole through the ice, and the "Nautilus" will enable the crew to leave the submarine for observations, or, in an emergency, they will be able to "escape" the "ice" by the use of the device.

The device will be used to bore a hole through the ice, and the "Nautilus" will enable the crew to leave the submarine for observations, or, in an emergency, they will be able to "escape" the "ice" by the use of the device.

## Branded Beef

1,363,223 Pounds Sold In Canada During Month Of April

## PLEASURES SO TEMPTINGLY SET FORTH AT MINAKI

So instant and complete is the appeal of the Minaki district that its description as the 'ideal vacation land' is barely adequate to the Indian, whose silent paddle lifts his waters with incredible swiftness. It was the 'Beautiful Country.' Later came voyagers, explorers, soldiers—La Verendrye, Mackenzie, Wolsley—and to one and all it was a region of serene loveliness.

The vacation visitor of today steps from the ease and comfort of a luxurious motor-coaching, or cruise, canoeing, sailing, or fishing, to the beauty of the woods district all the beauty of previous generations—and more, for now are added the delights and comforts of Minaki Lodge, exquisite log bungalow hostelry of the Canadian National Railway, which so harmonizes with its background as to leave no jarring note. Its accommodations are completely satisfactory from its spacious lounge and verandah to private room or suite or cabin.

And what of recreation? Golf is a good first, if you are so minded. Then there is miniature golf and tennis. But there are many other sports—fishing, canoeing, sailing, or fishing, to the beauty of the woods district all the beauty of previous generations—and more, for now are added the delights and comforts of Minaki Lodge, exquisite log bungalow hostelry of the Canadian National Railway, which so harmonizes with its background as to leave no jarring note. Its accommodations are completely satisfactory from its spacious lounge and verandah to private room or suite or cabin.

CHAPTER XXIII—Continued

"He stopped abruptly, while Angela cried, her voice sounding unnatural, the same place of mystery long unthought: 'What does that mean?'"

"That? Go with the drift," Angela said. "The sea is calm—my wife, and taking the child into his arms, rested his cheek tenderly against her hair."

Nick looked away, thinking: "I shall never hold Gay in my arms." His throat ached intensely, and not daring who might see, he buried his face in his arms.

Yet, after what seemed an eternity of misery, his heart lightened. He had been right. The sea was calm—even there in the cabin it was evident. Thank God the propeller had held out through the worst violence. Perhaps now—

"... if my fresh gale swept them—"

"He dared not hope, yet with the coming of the wind died, as if spent by its own fury, and the rain became a steady downpour that like all upon the troubled waters."

After a long, almost breathless interval Nick looked at the Colonel, his eyes asking a question, and from the Colonel to Myer, who had risen unsteadily to his feet. The boat lurched, and he stumbled—fell—but sprang up, and without a word went out, followed by Nick. When he returned he said, his voice harsh with feeling:

"The captain thinks the water is over. If we're far enough out so that we strike no land until the water is less disturbed, and if we have the luck to drift into some safe harbor—"

He left the sentence unfinished, while across the cabin his wife's eyes met his.

The Colonel said: "Thank God, and his voice shook."

Angela snuck back wearily, putting a hand over her trembling mouth, while from Amy Myer, clasping her child closer, came a dry sob.

All day they drifted; yet, overcome with exhaustion, they also slept in watches, and the hours passed, till, almost reluctantly, it seemed, the rain lessened—then ceased to fall. Slowly the clouds lifted, revealing a world of waste and restlessness. The day brightened; the waters grew more calm; and despite the fact that they were derelicts, drifting perhaps toward some perilous, hidden reef, hope sang in their hearts.

It was at dawn next day that Nick awakened suddenly from a heavy sleep. It seemed to him that the boat had shuddered, and then stood still. In an instant he was on deck; but the Myers and Colonel Howell were there before him, gazing in rapture at a wooded island a half mile off. The "Sea Bird" had struck upon the bar, which held it in its luscious grip from which it was never to be dislodged; but already the men were preparing to lower a boat.

Nobody spoke. No one seemed able to speak. The Colonel was plainly too moved for words. Amy was

thinking with the exaltation of one relieved: "My little Marjorie will live! She is going to live!"

Nick stood at a sort of trance. After that first enraptured moment he did not see the island, nor the palms, nor the dancing waves that looked angry no longer in the morning sunlight. He saw, only, through tears of which he was unashamedly liberal, the young figure clad in a khaki uniform, a crimson tam upon her head, a certain swiftness in her arm, a burden on a stick across her shoulder—

It was Angela who broke in upon this vision. She approached quickly, the only member of the party who had thought of raiment. Her gown rivaled the bluntness of the sea, and of her own eyes.

"Well, that looks something like it!" Her voice jarred on the atmosphere like a discordant note. "I suppose we're in some horribly out of the way spot. Why on earth could we have struck a place where we'd be picked up within a week? I detest camping!"

The spell that had held them all was broken. Everyone looked at her in a black amazement, even the captain who was approaching to speak to Myer. Their eyes were shocked—judgment, but Angela was unrepentant, she said, addressing the captain in a manner that was a bit arrogant: "Look here, Captain, where are we anyway? How long are we likely to stay in this God-forsaken spot?"

"The captain's eyes met hers and at something in their depths her own eyes dropped. He had followed the sea for many years—encountered danger without number many times; but not often had he been called upon to live through hours like those that had just passed. He was a plain man, blunt of speech perhaps, but deeply religious at heart, as are most men who have known death face to face. His eyes left Angela's to drink of the sea before them: the rippling water—the clear sky—the fairy island set against the level and the blue—

"God-forsaken!" he said. His eyes came back to hers and he said: "But for his goodness, Madam, he added grudgingly, 'you would now have been a Jew and the blue—'"

"God-forsaken!" he said. His eyes came back to hers and he said: "But for his goodness, Madam, he added grudgingly, 'you would now have been a Jew and the blue—'"

## Summer Camps

Almost everybody knows how Aspirin tablets break up a cold—but why not prevent it? Take a cold when you first feel the cold coming on. Spare yourself the discomfort of a summer cold. Read the proven directions on each package for headaches, pain, etc.

Made in Canada

moments of his life. He had gone for a tramp. Angela complained that he was always tramping.

"Why not?" he answered. "Someone must patrol this island. Who knows from where a boat might appear at any time?"

"You might at least ask for company," Angela was unrepentant.

"I don't want company," he replied bluntly. He was a little weary of the "inspired" speech of his captives.

"I can't take you because you'd only get by half a mile of it, and I'm going further. I think that point of land off to the south would be a good place to build a signal fire."

"But you've already built dozens!" Angela was not to be denied. "You're making plans for starting out with the captain in a small boat. It's absurd."

"He was a plain man, blunt of speech perhaps, but deeply religious at heart, as are most men who have known death face to face. His eyes left Angela's to drink of the sea before them: the rippling water—the clear sky—the fairy island set against the level and the blue—

## Frequent Drowning Accidents

Perils That Lurk in Lakes and Rivers Should Be Heeded

While hopeful progress is being made in the prevention of certain types of accidents, it is very evident that a campaign of education in regard to the perils that lurk in lakes and rivers is being needlessly sacrificed.

No less than eight drownings occurred in Manitoba in the last weekend in June. Twenty-two people met death in boating and bathing accidents in Ontario during the last weekend. One hundred and thirty-nine lives were lost in the same way on the Fourth of July in the United States.

The deplorable toll is mainly of young people, who seek the legitimate and wholesome pleasures of boating and bathing but who forget that the waters are merciless to those who are careless or take undue chances.

The fatalities that are continually happening indicate that the danger is not sufficiently realized by the young people, and points the necessity for a systematic campaign of prevention—Manitoba Free Press.

## THE RHYMING OPTIMIST

By Alne Michaelis

YESTERDAY

What is yesterday, my Dear? I just a shadow leaving; Wishing I could be the thing Worth no moments grieving.

Brave hearts thrust aside the past; Gave or gold it brought them; Pining all away at last; Save the truth it taught them.

What is yesterday, my Sweet? Just an echo going Down a bare, untrodden street Where the life is flowing.

Leave it as a brave heart must; With no thought of sorrow; Putting all your faith and trust In a glad tomorrow.

Miller's Women Powder seldom fails. It is a tribute of the women and expel them from the system. They are complete in themselves, not only as a nervous destroyer, but as a highly beneficial medicine for children, and a restorative for the debilitated system to which it is applied.

The growth of the child will be retarded and its constitution weakened.

## Depression May Be Helped

Keenly People How To Face Adverse Conditions With Fortitude

In time of depression prepare for property. By doing that you can keep your mind off your troubles and make life easier, and you can lay a foundation of policy that will be a help to you in the future.

There is No Good Reason

Why Alberta Wheat Pool Members  
Should Not Deliver All Their Grain to

## Alberta Pool Elevators

UNDER THE SYSTEM NOW IN EFFECT, ALBERTA WHEAT POOL WILL GIVE MEMBERS THE OPTION.

[1] Of delivering their wheat on a Pool basis, accepting the prevailing initial payment, and participating in any future payments which may accrue from the pooling thereof; or

[2] Of disposing of their wheat under any of the methods provided by the Canadian Grain Act, and obtaining full current market prices for the same.

Any portion of a member's wheat may be pooled or any portion sold outright for cash.

COARSE GRAINS will be handled by Pool Elevators on a commercial basis only, full cash payment being made as during the past year.

Your patronage of Pool Elevators will preserve for Alberta grain producers a grower-controlled, co-operative elevator system that has abundantly proven its value.

## World's Grain Exhibition and Conference

## Farmers Will Win \$210,750.00 in Prizes

The World's Grain Exhibition and Conference offers Canadian farmers an opportunity to show in cash prizes amounting to \$210,750.00. Competed in 50 competitive classes, open to the whole world, are 1,700 cash prizes. A few of the major awards follow:

\$5,500 a first prize for 50 pounds of wheat, 30 pounds of oats, \$1,500 for 40 pounds of barley, 50 pounds of rye, \$1,800 for 10 tons of corn, \$300 for 30 pounds of peas, 30 pounds of hay, 30 pounds of clover.

With this splendid opportunity before them, Canadian farmers should keep a watchful eye on their growing crops. They should mark for it should be understood that all seed and grain samples, if they are not already selected, will have to be (a) in crops of this year. All exhibits must be received by the Exhibition authorities on or before March 1, 1932.

Of vital importance to the advancement of Canadian agriculture will be the winning of World Championships in 1932 by farmers of Canada. They need and grain exhibits must demonstrate to the world the quality of Canada's field crops.

Select the classes from the prize list most suited to the crop you grow. It is best to make your entry NOW.

Your sample for exhibit must be in the hands of the Secretary at Regina on or before March 1, 1932.

Valuable information relating to the preparation of grain and seed for exhibit may be secured by writing to the Secretary of the Provincial Committee, World's Grain Exhibition and Conference, care Department of Agriculture, your own province.

Show what you grow and share what you know

On registration, the Secretary, World's Grain Exhibition and Conference, National Bank, Ottawa, will send you price list, rules and regulations governing competitive entries and all other information.
